

## 1500 W 220 V Doppel-Doppelkopf-Heizlampe für flexiblen PU-Leder- Prägedruck [Drucker Wärmelampen](#)

### Anwendung :

Raumheizkörper , Heimheizung , PTC-Heizung , Winterheizung , Warm [Doppelte Quarzglasröhre](#)

### **Spezifikation :**

|                                  |                                                  |
|----------------------------------|--------------------------------------------------|
| Gegenstandsart                   | 300W Infrarotlampen für SM52-Serie               |
| Garantie (Jahr)                  | 5000H                                            |
| Service für Beleuchtungslösungen | Heidelberger Offsetdruckprodukt IR-Trocknerlampe |
| Arbeitszeit (Stunden)            | 5000 Stunden                                     |
| Lichtquelle                      | Halogenlampen                                    |
| Eingangsspannung (V)             | 415V                                             |
| Lebensarbeitszeit (Stunde)       | 10000                                            |
