

850 nm 660 nm LED-Licht Therapiestab Anti-Aging-Gerät LED-Rotlicht

Aluminiumlegierung mit schwarzer Beschichtung

Basis: E 27

Automatische Kühlung mit Formschutz

Stabile Leistung für IR-Infrarot-Chips

3W Chip pro PC.

9 Stück Infrarot: 850 nm

9 Stück rotes Licht: 660 nm

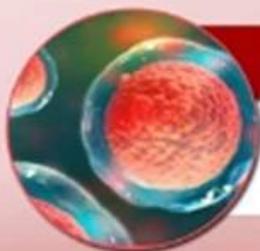

Parameterdetails:

Name	LED-Licht-Infrarot-Therapie
Farbe	Schwarz LED-Licht . (Schwarz-Weiß-Leuchte)
Spezifikation	54 W mit Steckerkabel und Befestigungsätzen
Material	Aluminium
IR-LED-Chips	850nm660nm 18PCS 3W/PC
Intensität	100 mW/cm ²
Stromspannung	100-240 V Wechselstrom, 50-60 Hz
Funktion	Bringt die Vitalität der Zellen ins Gleichgewicht, verbessert die Blutzirkulation und wirkt dem Alterungsprozess im Gesicht entgegen.
Besonderheit	Energiesparend, geringer Verbrauch

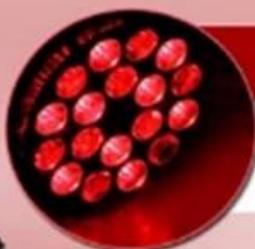

54W

Powerful
Red LED Light

Infrared light enhance cell vitality

Under infrared irradiation, capillary dilation, metabolism and cell viability and regeneration ability were improved

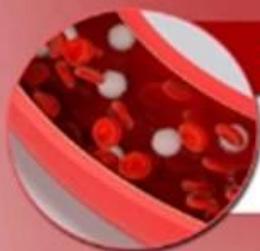

54 watt infrared light source

Because the distribution of heat on the irradiation area is more uniform, it covers a wider area, which can effectively relieve pain

Perfect Wavelength Combination for Light Therapy

PCS high-power deep red 660nm and 9PCS high-power deep red 850nm(looks dark, but more efficient) can penetrate deeper into muscles and body tissues, so as to more effectively relieve pain

Stimulate the circulation of blood

The infrared light penetrates into the deep layer of the skin, promotes the thermal cycle, increases the phagocytosis of white blood cells, and improves the immunity of the body
