

**Tubo di calore a doppio tubo di calore placcato in oro Tubo di riscaldamento a radiazione Onda media Onda corta Onda lunga Tubo al quarzo a infrarossi Elettrico Lampada riscaldante**

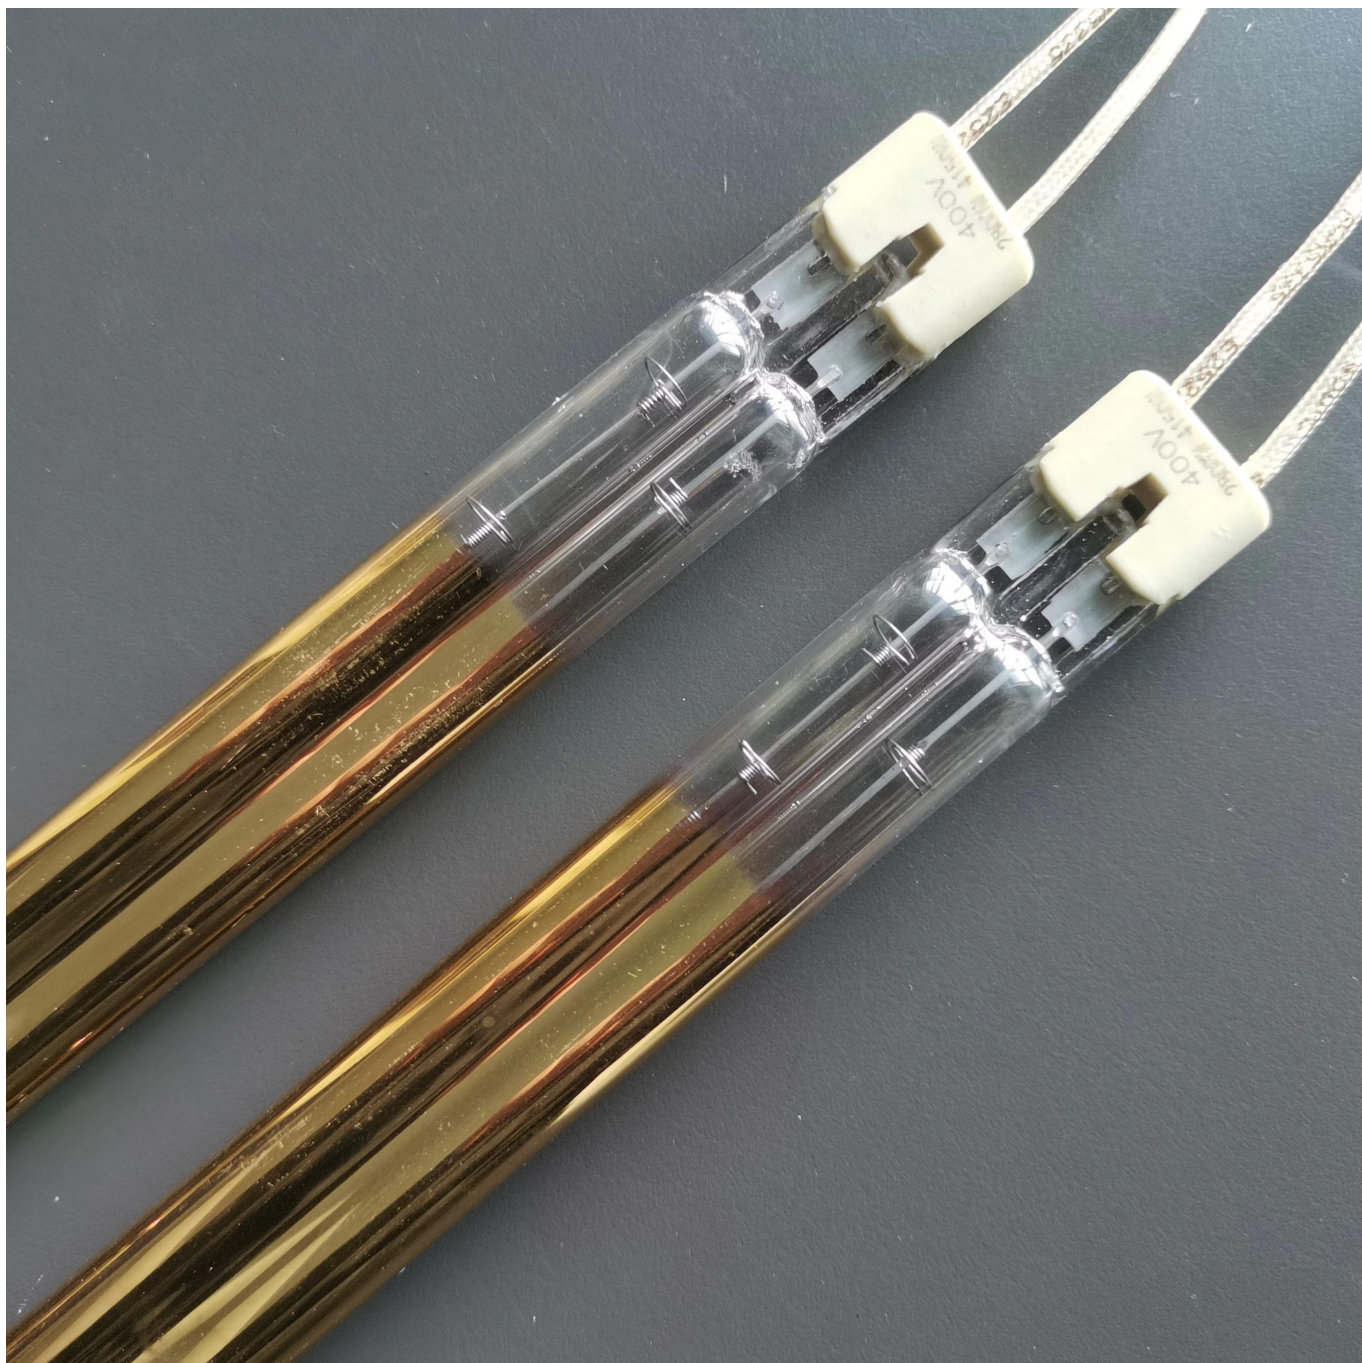

**Applicazione:**

Riscaldatore d'ambiente, Riscaldatore domestico , Riscaldatore PTC , Riscaldatore invernale , Caldo

**Lampada riscaldante a infrarossi lontani**

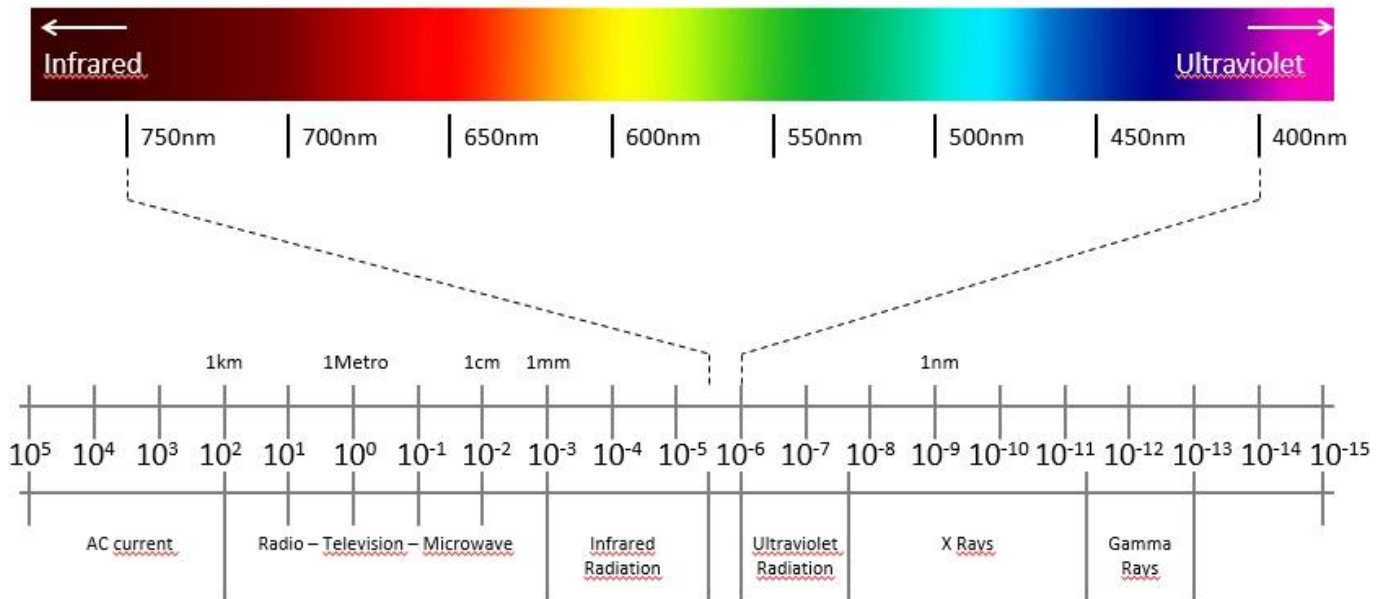

### **Specifica :**

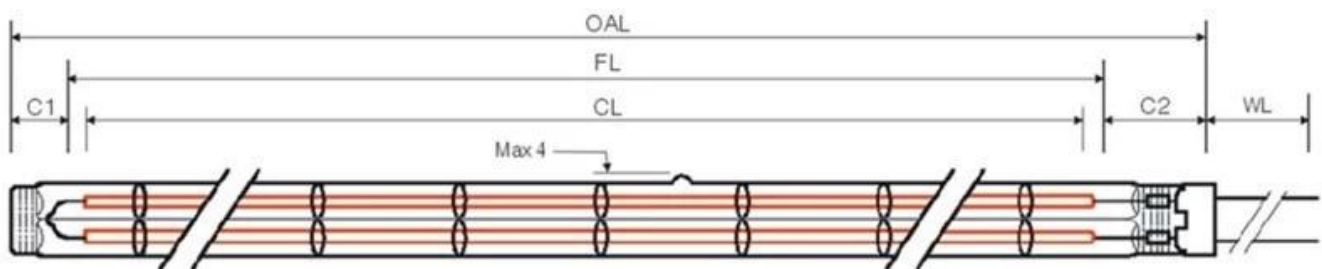

|                                     |                                                                    |
|-------------------------------------|--------------------------------------------------------------------|
| Tipo di articolo                    | Lampade a infrarossi da 2800 W per la serie SM52                   |
| Garanzia (anno)                     | 5000H                                                              |
| Servizio soluzioni illuminotecniche | Prodotto per stampa offset Heidelberg con lampada per asciugatrice |
| Orario di lavoro (ore)              | 5000 ore                                                           |
| Sorgente luminosa                   | Lampadine alogene                                                  |
| Tensione in ingresso (V)            | 400 V                                                              |
| Durata lavorativa (ora)             | 10000                                                              |
