說明書:

| | |
|-----------|---------------------|
| 型號 | LED-001 |
| 品牌 | LED (台灣) |
| 功率 | 54W (不含電壓轉換器) |
| 電壓 | 100-240V |
| IR LED 數量 | 850nm660nm 18 3W/PC |
| 光強 | 100mw/cm2 |
| 電壓 | AC100-240V 50-60HZ |
| 電壓 | 100-240V 50-60HZ |
| 電壓 | 100-240V 50-60HZ |

54W

Powerful
Red LED Light

Infrared light enhance cell vitality

Under infrared irradiation, capillary dilation, metabolism and cell viability and regeneration ability were improved

54 watt infrared light source

Because the distribution of heat on the irradiation area is more uniform, it covers a wider area, which can effectively relieve pain

Perfect Wavelength Combination for Light Therapy

PCS high-power deep red 660nm and 9PCS high-power deep red 850nm(looks dark, but more efficient) can penetrate deeper into muscles and body tissues, so as to more effectively relieve pain

Stimulate the circulation of blood

The infrared light penetrates into the deep layer of the skin, promotes the thermal cycle, increases the phagocytosis of white blood cells, and improves the immunity of the body
