**54W**

Powerful  
Red LED Light

### **Infrared light enhance cell vitality**

Under infrared irradiation, capillary dilation, metabolism and cell viability and regeneration ability were improved

### **54 watt infrared light source**

Because the distribution of heat on the irradiation area is more uniform, it covers a wider area, which can effectively relieve pain

### **Perfect Wavelength Combination for Light Therapy**

PCS high-power deep red 660nm and 9PCS high-power deep red 850nm(looks dark, but more efficient) can penetrate deeper into muscles and body tissues, so as to more effectively relieve pain

### **Stimulate the circulation of blood**

The infrared light penetrates into the deep layer of the skin, promotes the thermal cycle, increases the phagocytosis of white blood cells, and improves the immunity of the body
