

## **850nm 660nm LED Light Therapy Wand Anti-aging Device LED Red Light**

Aluminum alloy with coated black color

Base : E 27

Auto Cooling with mold shield

Steady Performance for IR infrared Chips

3W chip per pc.

9pcs of Infrared : 850nm

9pcs of Red lighth : 660nm

Parameter Details:

Name	led light infrared therapy
Color	Black <b>led light</b> . ( Black and white fixture)
Specification	54W with plug wire and fixture kits
Material	Aluminum
IR led chips	850nm+660nm 18PCS 3W/PC
Intensity	100mw/cm2
Voltage	100-240V AC 50-60HZ
Function	Enbalance cell Vitality/Situmunate circulation for blood, Face anti-aging.
Feature	Energy Saving Low Consumption

**54W**

Powerful  
Red LED Light

### **Infrared light enhance cell vitality**

Under infrared irradiation, capillary dilation, metabolism and cell viability and regeneration ability were improved

### **54 watt infrared light source**

Because the distribution of heat on the irradiation area is more uniform, it covers a wider area, which can effectively relieve pain

### **Perfect Wavelength Combination for Light Therapy**

PCS high-power deep red 660nm and 9PCS high-power deep red 850nm(looks dark, but more efficient) can penetrate deeper into muscles and body tissues, so as to more effectively relieve pain

### **Stimulate the circulation of blood**

The infrared light penetrates into the deep layer of the skin, promotes the thermal cycle, increases the phagocytosis of white blood cells, and improves the immunity of the body
