

## **Electronic UV Transformer Power Mercury lamp Metal UV Curing Lamp Energy Saving Electrical Digital Transformers**

|                         |                                                        |
|-------------------------|--------------------------------------------------------|
| Model Number            | Digital electronic transformer                         |
| Phase                   | Three                                                  |
| Usage                   | <b>UV</b> lamps working voltage and current adjustable |
| Rated Primary Voltage   | 220                                                    |
| Rated Secondary Voltage | 950                                                    |
| Power                   | 1kw-20kw                                               |
| Product name            | Electric tansformer                                    |
| Power                   | 1kw-20KW                                               |
| Type                    | Digital                                                |
| Application             | Machine UV equipment use                               |

Connect : 2 Pin in both head Style of **UV Transformer Curing Lamp**Infered Light China Supplier

**WARNING**

Refer to the instruction manual before  
using the device. Do not use the device  
unless it is properly calibrated.  
1. Do not use the device with any other  
device that is not approved by the  
manufacturer.  
2. Do not use the device with any other  
device that is not approved by the  
manufacturer.  
3. Do not use the device with any other  
device that is not approved by the  
manufacturer.  
4. Do not use the device with any other  
device that is not approved by the  
manufacturer.

MIDCO

00000

**WARNING**

1. Refer to the instruction manual before using the equipment.
2. Do not connect AC power to output terminals UV.
3. Do not remove any cover while applying power and at least 10min after disconnecting power.
4. Securely ground(earth) the equipment.
