

850nm 660nm Luz LED Dispositivo anti-envelhecimento da varinha de terapia LED luz vermelha

Liga de alumínio com revestimento de cor preta

Base: E 27

Resfriamento automático com proteção de molde

Desempenho estável para chips infravermelhos IR

Chip de 3W por pc.

9 unidades de infravermelho: 850nm

9 unidades de luz vermelha: 660nm

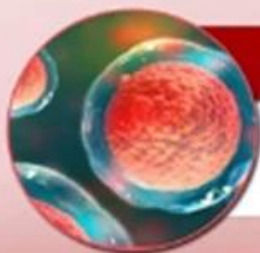

Detalhes do parâmetro:

Nome	terapia infravermelha clara conduzida
Cor	Preto luz LED . (Aparelho preto e branco)
Especificação	54W com fio de tomada e kits de fixação
Material	Alumínio
Chips LED IR	850nm660nm 18PCS 3W/PC
Intensidade	100mw/cm2
Tensão	100-240 Vca 50-60 Hz
Função	Equilibre a vitalidade celular/situmunate a circulação de sangue, anti-envelhecimento facial.
Recurso	Economia de Energia Baixo Consumo

54W

Powerful
Red LED Light

Infrared light enhance cell vitality

Under infrared irradiation, capillary dilation, metabolism and cell viability and regeneration ability were improved

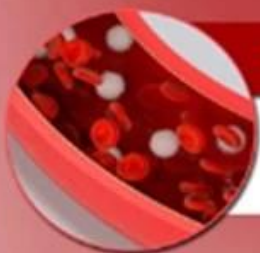

54 watt infrared light source

Because the distribution of heat on the irradiation area is more uniform, it covers a wider area, which can effectively relieve pain

Perfect Wavelength Combination for Light Therapy

PCS high-power deep red 660nm and 9PCS high-power deep red 850nm(looks dark, but more efficient) can penetrate deeper into muscles and body tissues, so as to more effectively relieve pain

Stimulate the circulation of blood

The infrared light penetrates into the deep layer of the skin, promotes the thermal cycle, increases the phagocytosis of white blood cells, and improves the immunity of the body
